GPX3 hypermethylation serves as an independent prognostic biomarker in non-M3 acute myeloid leukemia [Retraction]

The same paper entitled “GPX3 hypermethylation serves as an independent prognostic biomarker in non-M3 acute myeloid leukemia” was released in American Journal of Cancer Research. 2015;5:1786-1794. We must retract the same paper in American Journal of Cancer Research. 2015;5:2047-2055.
